Updated: 2017-10-08**Formal Education**

2000 Technical gymnasium Srednja Agroživilska šola, Ljubljana, Slovenia
Degree acquired in 2004

Experience with computers / programming

- 2016 Transferred to Igor Srdoč s.p.
Access to interdisciplinary team that specializes in computers, focusing my creative effort on this field
- 2011 Transferred to BIA Separations d.o.o. as IT department head
Gained business process experience, helping them automate by creating functional intranet applications
- 2010 Established web-development organisation DENIA with **Igor Srdoč**
Held lectures in website authoring for numerous startup founders who still remember us.
- 2008 Also a web-developer on the side
Worked with professional designers to write websites for companies like Biobanka d.o.o. and 12postaja
- 2003 Employed at BIA d.o.o. as an independent developer
Programming of research biological and chemical reactor - control software, for the Biotechnical faculty, Krka and Lek
- 2002 First international programming collaboration: **ICI-ICSA**; team of 3
A proof of concept peer-to-peer distributed execution system with high encryption; authored everything except encryption
- 2000 Worked with **Ryan Morris**
Programming team called MesonAI
- 1996 Mastery of programming language: QuickBASIC
Learned utilization of all the commands in the language
- 1993 First programming language: Sinclair BASIC
Dazzling programming with computer graphics
- 1990 First computer: HP 9825A
Learned to type before learning how to write

Work Experience**Commercial**

- 2016 Igor Srdoč s.p.
- System administrator
- Software developer
- Technical support engineer
- 2011 BIA Separations d.o.o.
- System administrator
- Software developer

2003 BIA d.o.o.
- Software developer
- Technical support engineer

Non-profit

2015 Društvo za trajnostni razvoj Duh Časa
- Senior engineer
- Work-process optimization advisor
- Developer

2010 DENIA - Development of European Non-Profit Internet Activity
- Web developer
- Lecturer

2010 Očistimo slovenijo v enem dnevu
- Technical support

2008 Earth Organisation for Sustainability
- Researcher
- Web developer

Skills & Personality

- PHP & MySQL, HTML5 / CSS3 / jQuery, etc
- Numerous industrial programming languages
- x86 Assembly, XSLT & XML
- Linux server (bash, etc)
- Windows domain administration
- Linux domain integration
- High reliability OEM
- Full stack developer

I have worked with many programming languages to date, to the point that learning a new language is inconsequential to me. However, I am very strong with programming languages that work well with me on an intuitive level. My favorite programming language is PHP, because it is possible to arrive at functional results in it quickly. I am very fond of Assembly, because I feel you cannot claim to know how to make safe code, if you don't know what's really going on. When asked to make a website, I write the HTML5 myself. I prefer lightweight IDEs and vim.

People value my professional attitude and my ability to make sure problems get solved. While I prefer to work with clear instructions and structure, I am quite capable of and have experience in leading projects and/or departments. When something is not working, my impulse is to first check my work for errors.

I appreciate function over form. I believe in professional values of quality and reliability, while also being willing and able to contend with the limitations of today.
